CARE FOR WORK ENVIRONMENTS®

Coil Doctor™

Aerosol Evaporator Coil Cleaner & Disinfectant

Coil Doctor is a powerful cleaner and disinfectant for air conditioning systems. The specialized formulation of surfactants easily penetrates dirt for easy removal while the disinfectant kills bacteria commonly found on air conditioning coils.

To keep air conditioning units running clean and efficiently, use Coil Doctor during routine maintenance and inspection of the system. Coil Doctor is specially formulated to remove heavy dirt and debris that commonly rob the efficiency of air conditioning systems. Its delayed foaming action allows the powerful jet spray to penetrate deeper into coils and then foam. This delayed action increases the cleaning action of Coil Doctor. As the foam expands it removes dirt and pushes it outward for removal. After cleaning, simply wipe off excess residual foam on the outside of the coils and return the unit to service.
