

WATER TREATMENT *Solutions*

ALG-ERASE™ **ALGAECIDAL TABLETS**

- Slow-release tablets offer broad-spectrum control of algae, bacteria and fungi
- Chlorine/Bromine formula is effective over a wide pH range
- Low-dusting, solid tablets are easy to handle and are easily added to system without overfeed

CARE FOR WORK ENVIRONMENTS®

ALG-ERASE™

ALGAECIDAL TABLETS

CONTROLS BIOLOGICAL GROWTH

Alg-Erase is a broad-spectrum biocide that controls algae, bacteria and fungi that commonly occur in open cooling tower waters. Algae and biomasses that form in these systems can block water flow and reduce the efficiency of cooling tower systems. Because Alg-Erase is a concentrated combination of Chlorine and Bromine, it is very effective over a wide pH range, making Alg-Erase more effective than liquid bleach products.

EASY-TO-HANDLE

Alg-Erase is convenient and easy-to-use. The low-dusting, solid tablets are easy to handle and provide a long-term, slow-release of powerful oxidizing biocide/algaecide for extended control in cooling water systems. The slow-release feature of Alg-Erase provides protection for your system without the fear of product over-feed. Alg-Erase is non-foaming when used as directed, and is effective in a wide variety of water conditions.

TECHNICAL DATA:

APPEARANCE: solid white tablets

FLASHPOINT: none

FOAMING: none at normal use concentration

TABLET WEIGHT: 20 grams/Tablet (0.044 lbs/tablet)

pH: 6.8

ACTIVE INGREDIENTS: 1-Bromo-3-chloro-5, 5-dimethylhydantoin 96.0%

EPA Reg. No. 83451-4-70799

DIN Reg. No. 24194
